

# Intelligent Cities Challenge

Guide for Applicants, Version 27 February 2020

The present Guide for Applicants presents a brief overview of the context and approach of the Intelligent Cities Challenge and describes the information needed to prepare a successful Expression of Interest. Applicants are strongly encouraged to thoroughly read through the guidelines before preparing an application.

# 1. What is the Intelligent Cities Challenge or ICC?

## 1.1 How did the Intelligent Cities Challenge come about?

European cities have a crucial role to play in cultivating digital transformation and growth. Urbanisation is increasing every year and 75% of the EU's population is already living in urban areas. People moving to cities leads to higher demand for living space and increasing traffic volume. Furthermore, cities have historically been hotbeds of innovation and progress. The proximity and density created by urban areas have always acted as drivers of inventiveness, creativity and growth. In recent history, the world's most radical innovations have been launched by actors located in cities, who have been able to source resources and knowledge locally.

Finally, the importance of the role of cities in the fight against climate change has also gained increasing recognition over the last three decades, as cities are large contributors of greenhouse gas emissions and other sources of environmental pollution, and actions to fight climate change at the cities and local levels have a high chance of generating immediate results. As a result, cities are in the driver's seat when it comes to the promotion and uptake of more sustainable growth and development models, protecting the environment, and ensuring better living conditions for their populations.

The European Commission fully recognises the need for an integrated and coordinated approach to improve the quality of life in urban areas. 2016 was an important year for moving forward in urban policy design in the EU, as illustrated by the adoption of the Pact of Amsterdam by the EU Ministers Responsible for Urban Matters, establishing the Urban Agenda for the EU. Key Partnerships were launched to tackle challenges of cities and to contribute to smart, sustainable and inclusive growth, on topics such as Urban Mobility, Digital Transition, Air Quality and the Circular economy. 2016 was also the year the European Commission launched the first in a series of 3 initiatives designed to accompany cities in their digital transformation for sustainable growth: the Blueprint for cities and regions as launchpads of digital transformation. This was followed by the Digital Cities Challenge which ran from 2017 to 2019.

The European Green Deal sets new ambitions for Europe to tackle climate change and environmental-related challenges. It is against this backdrop that the Intelligent Cities Challenge (ICC) is launched. This is the third and largest in a series of successful initiatives for digital transformation inside cities launched by the European Commission. Twice as many cities will be joining the Intelligent Cities network in comparison to previous initiatives. The Challenge will build on the successful Digital Cities Challenge and proposes an improved methodological process based on city feedback, adding more issue-specific advice, support mechanisms (e.g., new analytical tools) and an entirely new international dimension.

The Intelligent Cities Challenge (ICC) should be seen as the natural evolution and continuation of the previous initiatives which supported cities' digital transformation and industrial modernisation to enable them to take full advantage of digital and advanced technologies. However, there are also a number of key changes introduced by the ICC as compared to previous initiatives. The scope of the ICC is broader, including both advanced digital and non-digital technologies and there is an increased focus on sustainability, in addition to enhancing competitiveness and growth.

## 1.2 What is the overall ambition of the ICC?

The vision of the ICC is to create a European network of 100 intelligent cities that exploit the potential of emerging technologies and take ambitious steps to improve the quality of life of their citizens and ensure growth, sustainability and resilience. To this extent, the ICC will act as a driver for cities willing to live up to a simple expectation: that they can play a leading role in driving a technological revolution which will lead not only to increased growth and competitiveness, but more importantly, to healthier, greener and more sustainable living conditions and spaces of the EU's citizens. Effective technologies targeted to the right problems can deliver green, smart and sustainable growth for cities - improving the quality of life for everyone who calls them home. In this sense, the ICC is a unique and first-of-its-kind initiative, not only because of its scale and the uniqueness of its targets (i.e. small-to-medium-scale cities with unleashed potential), but also due to its holistic approach to building a better future for Europe.

## 1.3 What are the participation modalities of the ICC?

The ICC foresees different participation modalities:

- **ICC EU mentee cities** are cities that will directly benefit from the range of support and activities to be carried out in the framework of the ICC. Mentees will be selected through a competitive process (see below) implemented by a call for Expressions of Interest. The eligibility criteria to become an ICC EU mentee city are further described in section 3. of this document. EU mentee cities can apply on a stand-alone basis or as part of an ICC city consortium (see section 3.4 for additional information on stand-alone vs. consortium applications).
- **ICC EU mentor cities** are cities with higher levels of maturity and development, who wish to support the ICC beneficiary community by sharing their experience and know how. If you wish to become a mentor city, please contact the ICC directly to express your interest at the following email: [helpdesk\\_icc@technopolis-group.com](mailto:helpdesk_icc@technopolis-group.com). DCC mentor cities are invited to join the ICC community as mentor cities.
- **ICC international cities** or cities located outside of the EU can also participate in the ICC either as mentors or mentees. The goal is to create links between the ICC European network and non-EU cities in light of sharing good practices and implementing joint projects. If you wish to become an international ICC city, please contact the ICC directly to express your interest at the following email: [helpdesk\\_icc@technopolis-group.com](mailto:helpdesk_icc@technopolis-group.com).

The following sections of this document are mainly targeted at EU cities wishing to participate in the ICC as EU mentee cities (first of the above bullet points).

## 1.4 What types of cities does the ICC call for Expression of Interest target?

The ICC call for EoIs seeks to collect applications from EU cities who wish to become ICC EU mentee cities. These cities should display a high level of commitment and motivation to join the ICC and use it as a platform to advance their local policy agendas for digital transformation for sustainability. ICC wishes to work with cities of intermediate size (i.e. small and medium sized cities), with medium levels of maturity when it comes to the adoption of digital technologies for sustainable development, but which display a high level of potential to achieve transformative change in the short term.

The ICC call for EoIs is open individual municipalities or city governments, which represent the core of the ICC target group. However other forms of local governments such as city districts covering several neighbouring cities or municipalities may also apply to the ICC as long as they meet the eligibility criteria presented in section 3.2 of this document. This may include for instance applications on behalf of French municipality communities or other similar structures which exist in other Member States. If you have a doubt about whether your local government qualifies to apply to the ICC, write to our helpdesk.

## 1.5 How long will the ICC last?

The Intelligent Cities Challenge has a total duration of 26 months, running from May 2020 to July 2022. Selected cities are expected to remain engaged in the ICC throughout this time.

## 1.6 Where can I find out more about the ICC?

The ICC has a dedicated website which provides information on the challenge, the main upcoming events and also shares all material produced by the cities as the challenge progresses. If you are selected to become an Intelligent Cities Challenge, further information will be communicated to you on the Challenge. For the time being, your go-to sources of information about the initiative are the following:

- The current Guide for Applicants (this document);
- The FAQ section of the ICC website: this forum provides concise and easy to read answers to the most commonly asked questions as part of the ICC challenge. It is continuously updated with common questions from the information webinars and the helpdesk. The FAQ section can be accessed here: [intelligentcitieschallenge.eu/help](https://intelligentcitieschallenge.eu/help)
- The Email contact form: if you have not found the answer you are looking for through the FAQ section, you are able to submit your questions in 23 EU languages to our helpdesk. Rapid replies will be provided in English within 24 hours (except for weekends and holidays). To submit an email please use [helpdesk\\_icc@technopolis-group.com](mailto:helpdesk_icc@technopolis-group.com)
- In addition, a total of four informative Webinars are scheduled to help participants familiarise themselves with the ICC as well as the EOI process. We strongly encourage all interested applicants (new entrant ICC cities) to take part in at least one of these webinar sessions.

- Tuesday 3rd of March 2020 at 14h00 CET
- Tuesday 10th of March 2020 at 14h00 CET
- Friday 13th of March 2020 at 14h00 CET
- Wednesday 18th of March 2020 at 14h00 CET

In order to participate in one of the webinars, you should register here: [intelligentcitieschallenge.eu](https://intelligentcitieschallenge.eu).

Recordings of the webinars will also be made available on the ICC website.

## 2. What do cities stand to gain from participating in the ICC?

### 2.1 What is the ICC value proposition to participating cities?

ICC supports cities in implementing transformation strategies to address common challenges in becoming an intelligent city. The cities chosen to take part in the ICC will receive free-of-charge support needed to develop and implement strategies aimed at making them greener, more liveable and more intelligent. This will enable them to take full advantage of digital and non-digital technologies, to improve the quality of life of their citizens and ensure growth, sustainability and resilience.

Through their participation in the Challenge, cities will:

- Review existing strategies based on real stakeholder needs, and form a prioritized step-by-step roadmap;
- Use these to deliver quick win projects in the first 6 months, followed by larger projects that together result in a measurable improvement on city life.
- Become part of an international self-sustaining network of innovation and collaboration working towards the SDGs.

By the end of the programme, cities should expect to not only be transformed in their use of intelligent and advanced technologies, but long term, self-sustaining benefits:

- Quick win commitments in the first 6 months;
- Centre-stage of a new EU marketplace, designed for cities, SMEs, and a wide range of urban businesses;
- Joint investments to seek funding from EU financial instruments;
- New perspectives on the city's needs, progress, strengths as well as new opportunities for citizens affected by the transition to a greener economy;
- Learning from and developing long term collaborations with international mentors.
- Measurable impacts that matter to the citizens in 2 years;

Beneficiary cities will receive tailored support from a dedicated team of experts to design and roll out initiatives aimed at reaching established city ICC goals. In addition, participation offers a unique opportunity to build inter-city networks and collaborations with peers across Europe and beyond. As part of the ICC journey, each city will gain access to the following:

- Expert advice tailored to your city: regional specialists will deliver a programme based on the collective expert experience of over 100 smart city strategies, tailored to the biggest thematic issues for your city – be it energy, mobility or clean manufacturing, or other local priorities. This will include a number of local visits to your city and meetings with ecosystem stakeholders;
- Community conventions - for action over talk: regular gathering of EU smart ecosystem to compare performance; hear from world class speakers, receive targeted training; celebrate success and commit to shared action - procurement, standards or shaping marketplaces;
- Online toolbox to activate enablers: get best practice guidance on key enablers (e.g., creating value out of open data, breaking down market barriers for SMEs, finding new outcome-driven business models). Use also innovative tools to engage citizens to understand their views and help them track your progress;
- Mentoring to make partnerships – at home and abroad: get 1-on-1 guidance from the most innovative cities in the EU, who can steer you on your journey and connect you with their own solutions. Interact also with global participants, to learn, to trade and to create new markets.

## 2.2 What type of policy goals can the ICC help cities pursue?

The ICC can act as a catalyst for cities to implement policy agendas aimed at achieving green, social and intelligent transformative changes. Participation in the ICC can be linked to the following city goals:

- Transforming industry, green manufacturing and clean production
- Growing start-ups, SMEs and social economy
- Transforming and greening construction, housing and urban management
- Smart and sustainable tourism
- Smart and green mobility and transport
- eGovernment and digitising public services

- Enhancing citizen participation and connectivity
- Promoting health and wellbeing of citizens
- Supporting safety and security
- Innovative education and training for up- and re-skilling
- Waste management and circular economy
- Scaling up renewable energy solutions and energy-efficiency
- Efficient management of water and water systems
- Sustainable use and management of natural resources
- Sustainable and resilient food systems
- Climate resilience and disaster management.

In their applications, cities will be asked to identify up to four city goals and sectors they wish to build their involvement in the ICC on. This will constitute the basis for the development of thematic networks within the ICC community. Expressions of interest should also be tailored to these selected city goals.

## 2.3 In what language will the ICC be carried out?

The ICC official working language is English. Applications should be developed in English, and key deliverables to be developed once selected should be written and submitted in English (but can be translated into the local language). The working language of ICC events will be English (with the exception of some regional chapter meetings which will take place in local languages). City staff – and particularly local managers (see section 2.4) - involved in the ICC should have a good working level of English, meaning they should be able to present and draft deliverables in English, as well as interact with peer cities from the network. However, given the variety of city participants, a lot of the field and preparatory work can be done in the local language. Experts allocated to cities during the Challenge will always have a knowledge of the local language to facilitate interaction and strategy development with local city officials.

## 2.4 What commitments are expected from cities to join the ICC?

In order to participate in the Intelligent Cities Challenge, cities are required to demonstrate clearly their capacity and commitment to doing so. This will require allocating resources to managing, implementing and following up on the advisory services offered.

In practical terms, this will mean providing the following:

- A dedicated local project manager (PM) involved for the equivalent of at least two days per week throughout the project. The project manager must display a strong level of management and technology skills (without necessarily being an IT specialist). In addition, applicants will need to demonstrate that the designated PM has the ability to act as a local ambassador, to help build the local ecosystem, to convene people across government departments, and to break down silos to build and implement the ICC action plan. The Expressions of Interest should include the resumé and description of skills of the proposed candidate.
- Two advisors from the local eco-system (business sector, academia, NGO, etc) who are expected to play a hands-on role in the implementation of the ICC at the local level. Advisors are expected to contribute approximately two days per week of their time to the ICC and related activities. The Expressions of Interest should include the resumé and description of skills of the proposed candidates.
- The mobilisation of local stakeholders including, as a minimum:
  - Local administration in charge of economic development, innovation, smart specialisation and/or ICT
  - Representatives of industry/industry associations including ICT service providers and utility companies
  - Representatives of the education sector, such as those working in higher and secondary education institutes, research and technology organisations, vocational education and training programmes.
- A commitment to deliver the agreed/expected work between and leading up to the different working sessions and meetings
- Participation in ICC network meetings (c.a. four per year, financed by the ICC)

- The capacity to host and organise local workshops and working sessions (c.a. 4) as part of the advisory services provided by the ICC
- Support the expert team organise field visits, contact and mobilise stakeholders and draft deliverables
- A commitment to implementing the final strategy that will be co-designed together with the city stakeholders
- Ensure support from local elected leadership as illustrated by a local of support signed by the city mayor or leader of the city network. Mayors are also expected to participate in an ICC mayors meeting.

All of these points also apply to individual cities making up ICC city consortia (see section 3.4 of the applicant guidelines). In addition, consortia must appoint one coordinator in charge of overseeing consortium-level activities within the ICC. In their EoIs, applicants must be able to justify each of the above points. If any of these commitments are not respected upon selection, cities may be excluded from the ICC.

## 3. How do cities apply to the ICC?

### 3.1 What is the ICC call for Expressions of Interest and where can it be accessed?

ICC is a competitive challenge, open to eligible cities inside the EU. To take part in the ICC, cities must fill in and submit an Expression of Interest (EOI). Applications will be reviewed by an expert team of evaluators who will score EoIs based on pre-defined evaluation criteria. The final list of selected participating cities will be validated by the European Commission in light of ensuring a balanced geographical and thematic distribution within the ICC network.

Applications are eligible only if they are:

- Supported by a letter of intent signed by the local leadership (e.g. mayors).
- Duly completed and submitted according to the modalities set out in Section 3.6 and before the deadline set in Section 3.5. Incomplete EoIs will automatically lead to their exclusion.
- Submitted in English via the on-line management system. EoIs submitted in any other language will be excluded.
- Respect the total character limits. Additional elements can be transmitted as Annexes (e.g. letters of support etc).

All information related to the EOI is available online at [intelligentcitieschallenge.eu](http://intelligentcitieschallenge.eu). In order to submit an EoI and receive all the supporting documentation, applicants need to register beforehand. The application should be submitted via the platform. A pdf version of the full EoI can be downloaded first for applicants to fill in the information offline. EoIs can be up to 8 pages at long at most (i.e. 6 sections of up to one page, and one section of up to two pages). Text can then be copied and pasted into the on-line system once it has been drafted.

## 3.2 Who is eligible to apply to the EoI as an EU mentee cities?

The following criteria only apply to EU mentee applicants (see section 1.3 for a definition of EU mentee cities). ICC mentee applicants must be:

- A local public government entity (i.e. municipalities, districts) that are either responsible for or involved in the funding and/or implementation of a policy or programme of a city related to digital transformation, smart / intelligent city, sustainable urban development.
- Located within the European Union .
- Representing cities with more than 50 000 inhabitants.
- The following cities are not eligible to apply:
  - EU cities with less than 50 000 inhabitants and not applying as part of a consortium (see section 3.4 for the formal definition of ICC city consortia).
  - Cities located outside of the EU.
  - Cities with advanced levels of digital technology for sustainability uptake and well-developed ecosystems.

Applications from cities located in EU outermost / island regions are actively encouraged.

## 3.3 Can EoIs be pre-screened by the ICC before being submitted?

Before the application submission deadline, applicants have the possibility of requesting a pre-screening of the applications by the ICC team. The objective of the pre-screening is to provide feedback on the ‘completeness’ of the EoI, not on the actual quality of the application and its content. Pre-screening is meant to allow applicants to ensure they have provided all of the requested information in order to avoid disqualification and improve the robustness of their EoI by covering all of the elements evaluators will be looking to assess. Pre-screening will be done only on-demand for applicants who request it, it will not be done systematically for applicants.

The pre-screening option will be available until the second-to-last week, prior to the submission deadline (to allow the screening to take place before the deadline, and for applicants to improve their applications). After filling in all of the EoI sections on-line, applicants will be able to select two options:

- Save and submit for screening: this will save the application but will leave it open for future modifications by the applicant, and will alert the ICC team that a pre-screening has been requested. The team will conduct the pre-screening on the basis of a checklist, and provide feedback to the applicant on elements which may be missing. Applicants will be able to return to their EoI and introduce changes before the deadline.
- Submit and lock: This option will definitively submit the application and lock it. No further changes will be possible to the EoI. This should be done by applicants who do not wish to have their EoI screened, or by applicants who have already received feedback after initial screening.

### 3.4 What are ICC city consortia and how do they apply?

Cities can apply individually (i.e. stand-alone applications) or as member of a group of cities called ICC city consortia. The main rationale behind the development of city consortia is to drive ICC multiplier effects, and facilitate the delivery of common projects among members of single consortia. City consortia can be one of the following:

- A group of cities located in a single EU region belonging to a formal network or federation of cities (e.g. members of the Andalucía Federation of Municipalities and Provinces).
- A group of cities belonging to a formally constituted common thematic network (e.g. network of coastal cities)
- A group of cities joining an *ad-hoc* city consortium made up for the purposes of this EoI

Cities are equally welcome to apply individually, and are not disadvantaged from not being in a consortia. If cities decide to apply as a consortium, only the lead organisation will need to submit an EoI on behalf of all members, listing the names of the individual cities which make up the consortium. However, all consortia will be assessed for their perceived ability to act as a coherent unit throughout the programme and drive change in their individual city members.

The EoI should be submitted using the same on-line submissions system as for stand-alone applications. Applicants must read carefully the instructions for each of the sections of the EoI to be prepared, in order to identify the information to be provided at the consortium level. In addition, consortia will have to provide a joint letter of support signed by the mayors of all of the participating cities; as well as a

letter of commitment signed on behalf of the lead organisation. The lead organization of the consortium can be one of the member cities of the consortium, or a third party such as network or federation. The lead organisation will also have to identify and designate a consortium coordinator in charge of overseeing all consortium-level ICC activities (see also section 2.4).

### 3.5 What is the deadline to apply to the ICC?

Cities can apply for this call between Thursday 27/02/2020 and Monday 06/04/2020 at 11h59 pm. Cities will be informed of results during the third week of May 2020. Selected and non-selected applicants will receive feedback on their application by the end of May 2020 at the latest.

### 3.6 What information should be included in the Expression of Interest?

There are a total of seven sections as well as an Annex to be completed for the EOI application. These sections are detailed in the table below. Applicants should refer to the Eoi form which is downloadable from the ICC site for more detailed instructions on how to fill out each section and the information to be included. The following table is provided for indicative purposes only.

Applicants are welcome to upload additional documents which support their application, such as letters of support. Supporting figures and graphs (e.g. presentation of the local eco-system) should be included as annexes and will not be included in the total page count tally. An explicit reference should be made to the titles of tables and figures, as well as any supporting document, in the body of the Eoi.

Section of the Eoi	Max length / Format	Information to be provided by applicant
--------------------	---------------------	---

<p><b>1. Key motivations and city goals</b></p>	<p>Up to 1 page of open text</p> <p>Multiple Choice Question</p>	<ul style="list-style-type: none"> <li>• Presentation of key city or consortium challenges applicants seek to address and overcome, and links to ICC goals.</li> <li>• Applicants indicate preferences of city goals they wish to focus on as part of their participation in the ICC. Cities and consortia select and rank up to four city goals and priority sectors.</li> </ul>
<p><b>2. City strengths and assets</b></p>	<p>Up to 1 page of open text</p> <p>Open text</p>	<ul style="list-style-type: none"> <li>• Presentation of key city and consortium strengths and assets to address identified challenges and city goals <ul style="list-style-type: none"> <li>• Presentation of general economic and demographic indicators of the city</li> <li>• Data on key economic sectors relevant to the challenges the city wants to address</li> </ul> </li> <li>• Qualitative assessment of strengths and assets</li> </ul>
<p><b>3. The city ecosystem</b></p>	<p>Up to 2 pages of open text</p>	<ul style="list-style-type: none"> <li>• The applicant demonstrates its capacity to mobilise and tap into existing networks and stakeholder communities to support and drive the ICC process and implementation of action plan</li> <li>• Cities and consortia will be asked to provide letters of support as part of their Eols from existing networks, platforms, committees, and key institutions supporting the city in ICC</li> <li>• City consortia should present any existing consortium-level ecosystems.</li> </ul>
<p><b>4. Local policy landscape and available resources</b></p>	<p>Up to 1 page of open text</p>	<ul style="list-style-type: none"> <li>• Describe existing strategies and roadmaps relevant to the challenges and city goals selected in 1, which could benefit from the ICC assistance and support.</li> <li>• Present pipeline of existing projects in relevant fields, and an overview of financial resources available to support the implementation of the ICC agenda and action plan.</li> </ul>
<p><b>5. Proposed ICC team</b></p>	<p>Up to 1 page of open text</p>	<ul style="list-style-type: none"> <li>• Presentation of the proposed ICC local team including qualifications and expertise as well as the planned resources for the ICC.</li> <li>• For consortia, this should include the name of the consortium coordinator within the lead organisation.</li> </ul>
<p><b>6. Inter-city collaboration ambitions</b></p>	<p>Up to 1 page of open text</p>	<ul style="list-style-type: none"> <li>• Describe intended collaborations with other cities, if any, including the form of collaboration and the added value of the collaboration. This could include collaborations with ICC cities as well as with other cities belonging to other networks and initiatives.</li> <li>• Applicant involvement and role in city networks relevant to the ICC</li> <li>• For ICC city consortia, this section should include an explanation of the common vision at the consortium-level, as well as reference to</li> </ul>

		the specific projects the consortium wishes to implement through a collaborative approach.
<b>7. Expected results and impact</b>	Up to 1 page of open text	<ul style="list-style-type: none"> <li>Describe expected results of participation in the ICC.</li> </ul>
<b>8. Annexes</b>		<ul style="list-style-type: none"> <li>Mandatory signed letters from mayors.</li> <li>Any supporting documentation the city may want to provide, including Letters of Support. References to the provided Annexes must be made in the main application</li> </ul>

### 3.7 How should applicants prepare and submit their EoIs?

EoIs must be submitted via the online management platform at [intelligentcitieschallenge.eu](http://intelligentcitieschallenge.eu). Applicants must first register on the platform to be able to access the on-line submission form. You can also download a pdf version of the Eoi. It is recommended that applicants first fill out the Eoi offline, and then proceed to upload text and annexes on the on-line submission system. Applications can be filled on-line incrementally, and can be saved every step of the way to come back to the application at a later stage. When reaching the final section, applicants will be asked if they wish to save and submit for pre-screening, or submit and lock their application. The former will trigger the pre-screening of the saved application by the ICC team and delivery of feedback on completeness (see section 3.6); while the later will lock the submitted application and indicate that it's ready for final appraisal. Applicants are then able to track the status of their EOI through their user account on the platform.

### 3.8 How will EoIs be assessed and selected?

All applications that meet the eligibility criteria will be scored, based on the selection criteria presented in the following table.

Eoi quality, potential and relevance evaluation criteria	Weight in the final evaluation	Indicative assessment elements
--	--------------------------------	--------------------------------

<b>1. Key motivations and city goals</b>	20%	<ul style="list-style-type: none"> <li>• Understanding of the ICC objectives and alignment between city expectations and ICC goals</li> <li>• Relevance of selected city goals vis à vis city challenges</li> <li>• Level of motivation and commitment to reach results</li> <li>• Level of support from local authorities</li> <li>• Evidence of political commitment and backing of the ICC application</li> <li>• Fitness for purpose of organization interested in leading the ICC</li> </ul>
<b>2. City strengths and assets</b>	10%	<ul style="list-style-type: none"> <li>• Adequacy of city background vis à vis ICC target group (e.g. medium maturity)</li> <li>• Potential of the city to address city goals based on the existing strengths and assets</li> <li>• Demonstrated added value of ICC in unleashing city potential</li> </ul>
<b>3. The city eco-system</b>	20%	<ul style="list-style-type: none"> <li>• Relevant and coherent local eco-system mapping, relevance of the ecosystem with regard to identified city goals</li> <li>• Potential to mobilise relevant stakeholders for the purpose of building local ICC eco-system and launch strategy and action plan</li> <li>• Level of support for the city to engage in the ICC within the local network of stakeholders</li> </ul>
<b>4. The local policy landscape and available resources</b>	15%	<ul style="list-style-type: none"> <li>• Existence of a relevant local policy framework and accompanying resources</li> <li>• Existence of additional complementary initiatives, especially at EU level</li> <li>• Existence of a pipeline of projects in relevant fields</li> <li>• Evidence of added value of the ICC with regard to the existing policy framework</li> </ul>
<b>5. Presentation of the proposed ICC team</b>	15%	<ul style="list-style-type: none"> <li>• Availability of team with relevant expertise</li> <li>• Full composition of team</li> <li>• Allocation of sufficient resources to ICC</li> </ul>

<p><b>6. Inter-city collaboration ambitions</b></p>	<p>10%</p>	<ul style="list-style-type: none"> <li>• Motivation to collaborate with other cities and engage in cross-city collaborations</li> <li>• Participation in existing city networks</li> <li>• Relevance and added value of the consortium approach (if applicable)</li> <li>• Capacity to identify actions to be implemented through a collaborative approach at the EoI stage</li> </ul>
<p><b>7. Expected results and Impact</b></p>	<p>10%</p>	<ul style="list-style-type: none"> <li>• Realistic yet ambitious expectations of impact of participation in the ICC</li> <li>• Willingness of the city or consortium to commit to achieving certain results</li> <li>• Coherence of expected impact vs selected city goals</li> <li>• Innovative nature of expected impact described</li> </ul>

Based on the above criteria and weighting system EoIs will be scored. EoIs which do not meet the minimum threshold will be excluded. The remaining cities will be placed on the EoI longlist. The final selection will include the top-ranked cities. However, the final selection will ensure a balanced geographical distribution meaning that non top-ranked cities may be included in the final selection.

### 3.9 When and how will applicants receive the results of the EoI?

EoIs which are deemed not eligible will be automatically notified upon the closing of the EoI submission period. Remaining applications will be notified of the final results during the third week of May. Feedback sheets will be provided to all applicants at the end of May at the latest. All decisions are final and cannot be appealed.
